

MGFA Partners in MG Care Program

The MGFA Partners in MG Care cohort is comprised of providers who have an interest in treating MG patients and are committed to making life better for those living with MG.

All providers that are part of Partners in MG Care are listed on the MGFA website. This list is available for patients and caregivers in the event they are looking for a reference for care.

All MGFA Partners in MG Care go through an evaluation process and are committed to:

- Providing quality care to MG patients
- Empowering patients and caregivers by providing accessible education and resources
- Participating in knowledge-sharing, professional education, and networking opportunities in the MG space
- Engaging with and staying informed about the work of the Myasthenia Gravis Foundation of America

Becoming a Partner in MG Care:

To become a Partner in MG Care, we request a completed copy of the MGFA Partners in MG Care application. The Partner in MG Care Council evaluates applications and will be in touch with any specific questions.

The Partners in MG Care application is [linked here](#).

Partners in MG Care who do not periodically provide us with updated contact information can be removed from the Partners in MG Care list. This is to ensure to maintain a robust network of professionals. Notification will be provided and an opportunity to remedy will be available prior to removal.

Referring a Care Provider:

We greatly appreciate and trust our partners to refer other MG care providers. To refer a care provider, please complete [this referral form](#).

We kindly request your name and email along with the person you are referring's contact information. We will reach out directly to them to share the application and let them know a current partner referred them.

We are looking to expand our list of care providers to include mental health professionals, physical therapists, neurologists, and other care providers as appropriate.

Our Partnership:

As a Partner in MG Care, you will:

- Be listed on our website as a Partner in MG Care. This list is available for patients and caregivers in the event they are looking for a reference for care.
- Receive personalized, direct communication from the MGFA team. This will ensure you are informed and are able to engage in our work.
- Have the opportunity to attend Partners in MG Care networking events and other MGFA events as applicable.

MGFA Partners in MG Care Program

We request each of our Partners in MG Care:

- Stay informed about our work at MGFA. We will streamline this to make it as easy as possible by directly sending you updates that may be of interest you.
- An openness to receive and share educational materials as appropriate with patients and caregivers at your practice.
- Communicate any changes in contact information in a timely manner. You can submit changes to your contact information through the [submission form here](#).
- Engage as you are able. We will keep you informed about ways to connect. As a Partner in MG Care, you are vital to our work, and we are grateful for your partnership. ***Your support makes a difference.***

Gold Star Partners in MG Care:

We recognize our partners will engage at various levels with MGFA and to recognize those who engage in a meaningful way on an annual basis we will implement a “gold star” notation system on our website.

Partners who engage in one or more meaningful ways each year and confirm their contact details annually will receive a “gold star” next to their name on our website. Examples of meaningful ways to engage are listed below, but our partners are not limited to this list.

The MGFA will actively promote ways to both engage and keep your contact information updated by communicating directly to partners via email. For a list of current opportunities, please visit our Partners in MG Care homepage.

Example Engagement Opportunities

- Participate in a special workgroup as identified by the MGFA
- Attend an event hosted by MGFA
- Request printed materials to share with patients
- Speak at an event hosted by MGFA (in person or virtual)
- Write a blog post for MGFA
- Review drafted materials and offer expertise for patient resources
- Attend a MGFA Health Fair
- Refer a care provider to become a Partner in MG Care
