

Do You Have Muscle Weakness?

These symptoms can be caused by **MYASTHENIA GRAVIS**

Drooping Eyelids

Slurred Speech

Blurred/Double Vision

Weakness in Neck, Arms & Legs

Limited Facial Expressions

Myasthenia Gravis Is...

...a disorder causing **extreme** muscle weakness and can impact a person's ability to see, smile, walk, talk and breathe. In MG, the body's immune system attacks the connection between the nerves and the muscles, limiting the ability of the brain to control muscle movement.

Antibodies block the **neurotransmitters** from connecting to **receptors**

Who Gets MG?

MG affects people of all races, genders and ages. Like snowflakes all MG cases are unique.

MGFA Can Help

If you or someone you know is experiencing sudden or gradually increasing symptoms of muscle weakness, it could be a sign of MG or another serious condition. Talk to your doctor if you are short of breath, have difficulty smiling, talking or swallowing, or cannot walk any distance without having to rest.
